

## Energy Efficiency Consultant (Job ID# EEC2010)

Energy Market Innovations (EMI) is seeking an **Energy Efficiency Consultant** to join our team in our Seattle office. The ideal candidate is a mid-career professional with experience in the energy efficiency industry who is seeking an opportunity for career growth in an entrepreneurial culture, where individual contributions are recognized and valued. Employee growth and intellectual contributions are fundamental to EMI's culture and vision.

The ideal candidate should have the following profile:

- Working understanding of the energy efficiency industry, including but not limited to energy efficiency, demand response, or renewable program design, implementation, and evaluation, as well as the state/federal regulatory and policy context that underlies the industry.
- Understanding of the supply chain for energy efficient technologies and services in various commercial, industrial, and residential market segments.
- Demonstrated experience in managing and conducting program evaluations, market assessments, and/or customer research, and an aptitude for synthesizing results to create strategic value for the client.
- Demonstrated knowledge of quantitative and qualitative analysis methods for program impact and process evaluations.
- Minimum of 5 years of consulting experience.
- At least a Masters degree in Economics (energy, industrial, behavioral, resource/environmental), Engineering (Mechanical, Architectural, Building Systems), Public Policy, Environmental Studies, Statistics, Urban Planning, Sociology, or comparable field.
- Excellent written and oral communication skills.
- Self-motivated with the ability to take ownership, initiative, and accountability for the quality of research and accuracy of results provided to EMI's clients.

### About EMI

EMI is a specialized consulting firm that develops strategies to support energy efficiency and renewable energy investments by electric and gas utilities nationwide. Situated in a dynamic and growing field, our niche expertise in this highly complex and evolving industry allows us to work with utilities across the country and partner with a variety of leading consulting firms. In our unique position, every client engagement allows our team to make a valuable contribution to shaping the future energy landscape.

We offer a flexible, collaborative, and entrepreneurial work environment and encourage each other's creativity and intellectual curiosity to create value for our clients. Our open-loft office space is located close to the waterfront and ferries in downtown Seattle – an easy bike commute from any of Seattle's diverse neighborhoods, and close to an amazing array of natural beauty and outdoor recreation opportunities. If you think you may be a good fit for our team, please visit us at [www.emiconsulting.com/careers.html](http://www.emiconsulting.com/careers.html) to submit your resume along with a cover letter referencing the job ID#, writing sample, and two (2) references!
